

Meditation Experience

In that meditation experience, I felt the perception of time changed, and I had an “empty” feeling.
I was wondering, if every single moment will disappear forever without any recording, who can demonstrate we had existed in this world.
And the ultimate question: what does it mean we exist in this world.

AR Application

I designed this piece, which is an AR application. I hope to establish a sculpture for every moment of time in the virtual world. The 3D sculpture is monumental meaning. I also thinking about what is the meaning of time when human could immortal, when our consciousness could Independent exist in a virtual world.

SCULPTURE OF TIME

IN THE VIRTUAL WORLD
FOR MEMORY
